Memo

September 8, 2006, 6 PM CDT

To: Kim Licitar, National Weather Service Milwaukee/Sullivan
             Information Technology Officers of other Central Region WFOs

From: Jordan Joel Gerth, Project Maintenance Programmer
             Cooperative Institute for Meteorological Satellite Studies

To all affected sites:

If you wish to add CRAS forecast satellite imagery to your AWIPS workstations, it is advised you upgrade your copy of processMODIS.pl and change the location of the temporary MODIS directory on PX1.

– Move /data/fxa/sat/SBN/netCDF/LOCAL/temp to
  /data/fxa/sat/SBN/netCDF/LOCAL/MODIS/temp
– Change the $tempdir variable in processMODIS.pl to reflect the above change

If you have any problems, please contact me.
