
CONTENTS

Foreword	vii
Welcome Addresses	viii
Report of the Chairperson of Session 1, D. B. Miller <i>Operational Extraction of Cloud Motion Winds from Current and Future Geostationary Satellite Systems</i>	1
Report of the Chairperson of Session 2, A. Thoss <i>Wind Tracking from Absorption Channel Data</i>	3
Report of the Chairperson of Session 3, D. E. Hinsman <i>Verification and Impact Studies of Operational Wind Data</i>	4
Report of the Chairperson of the Panel Discussion, W. L. Smith	6
Report of the Chairperson of Session 4, J. Schmetz <i>Future Studies and Developments</i>	8
Report of G. Szejwach <i>Conclusions and Recommendations</i>	10

LECTURES

SESSION 1

OPERATIONAL EXTRACTION OF CLOUD MOTION WINDS FROM CURRENT AND FUTURE GEOSTATIONARY SATELLITE SYSTEMS

J. Schmetz <i>Further Improvements of Cloud Motion Wind Extraction Techniques</i>	15
L. D. Herman <i>The Current Stage of Development of a Method of Producing Cloud Motion Vectors at High Latitudes from NOAA Satellites</i>	21

H. Uchida <i>Height Assignment of GMS High-Level Cloud Motion Wind</i>	27
U. V. Gopala Rao <i>Operational Derivation of INSAT Winds Present Status and Future Plans</i>	33
A. Karpov <i>Soviet Geostationary Operational Meteorological Satellite GOMS: Current Status and Perspectives for Wind Data Extraction</i>	39
D. E. Hinsman <i>WMO Support for Satellite Activities: A Means Towards Standardization</i>	49

SESSION 2
WIND TRACKING FROM ABSORPTION CHANNEL DATA

A. Szantai <i>Wind Extraction and Validation from the Water Vapor Channel of METEOSAT During the International Cirrus Experiment</i>	63
H. Laurent <i>Wind Extraction from Multiple METEOSAT Channels</i>	71
W. P. Menzel <i>The NESDIS/CIMSS Winds Algorithm: Current Status and Future Improvements</i>	77
G. Büche <i>Displacement Vectors from METEOSAT WV Images Using a New Extraction Technique</i>	91

SESSION 3
VERIFICATION AND IMPACT STUDIES OF OPERATIONAL WIND DATA

T. T. Fujita <i>Interpretation of Cloud Winds</i>	99
--	-------	----

A. Thoss <i>Cloud Motion Winds, Validation and Impact on Numerical Weather Forecasts</i>	105
C. S. Velden <i>The Impact of Satellite-Derived Winds on Hurricane Analysis and Track Forecasting</i>	113
P. R. Julian <i>A Comparison of Cloud Motion Vectors and Aircraft Winds</i>	119
H. Woick <i>Verification of Cloud Motion Winds from METEOSAT Results of a METEOSAT-GOES Wind Intercomparison Campaign in August 1990</i>	127
J. Le Marshall <i>Real Time Cloud Drift Wind Calculation and Application in the Australian Region</i>	139
R. W. Lunnon and D. A. Lowe <i>A Study of Different Methods of Interpolating Numerical Forecast Data for the Purpose of Validating Cloud Motion Winds</i>	145
B. Strauss <i>Monitoring of Cloud-Motion Winds at ECMWF</i>	151

**SESSION 4
FUTURE STUDIES AND DEVELOPMENTS**

C. M. Hayden <i>Research Leading to Future Operational Methods for Wind Extraction</i>	161
D. A. Lubich and J. F. Purdom <i>The Use of cloud Relative Animation in the Analysis of Satellite Data</i>	171
W. E. Shenk <i>Suggestions for Improving the Derivation of Winds from Geosynchronous Satellites</i>	173

K. Holmlund <i>Tracer Quality Identifiers for Accurate Cloud Motion Wind Estimates</i>	181
W. L. Smith <i>Altitude Specification of Cloud Motion Winds</i>	189
F. Gérard <i>The Meteosat Second Generation Imager: Definition and Challenges</i>	199
Y. M. F. Lure, H. Y. M. Yeh, C. P. Arnold <i>Potential Application of Artificial Neural Network (ANN) to Wind Extraction Based on Cloud Motion in Satellite Images</i>	207
R. K. Anderson <i>Cloud Drift Winds Made from Rapid Scan Imagery Data Obtained During the Experiment on Rapidly Intensifying Storms over the Atlantic (ERICA)</i>	221
Author Index	225
List of Participants	227
