

The NGFS alert dashboard now includes an optional audio alert feature

The screenshot shows the NGFS alert dashboard interface. At the top, it displays 'NGFS Home', 'NGFS Prototype: Thermal Anomalies', and 'Last updated: 14:25:52 UTC'. Below this is a filter bar with 'Countries: All Countries selected', 'Locations: All WFOs selected', 'Rankings: All selected', and 'Time Threshold: 1 day'. An 'Edit Settings' button is also present. The main content is a table with columns: 'Location', 'NWS WFO', 'Most Recent Alert', and 'Alert Info'. The table lists several locations with their corresponding WFOs and alert times. A red audio icon is located in the top right corner of the table area, with a blue arrow pointing to it from the text on the right. At the bottom, there is an 'Automated Alert Ranking' section with color-coded indicators for Rank 1 (pink), Rank 2 (red), Rank 3 (orange), Rank 4 (yellow), and Rank 5 (green).
